

## Remote Pairing Process –UIC series

Presented by  
Adonis Team

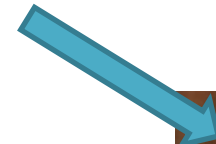

## Remote Pairing

MIC Button on Remote control to give Voice command.

After pressing any button if RED LED glowing means remote is not paired for voice command. So if you press MIC button TV will not take voice command, it will go into device searching mode.

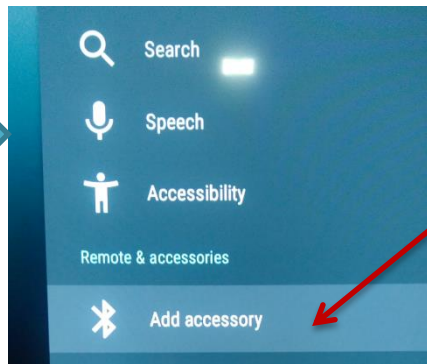

Press and Hold the HOME+LEFT ARROW KEY for few sec, Initially LED will be RED then it will start Blinking Green, Green blinking means now remote is ready to pair

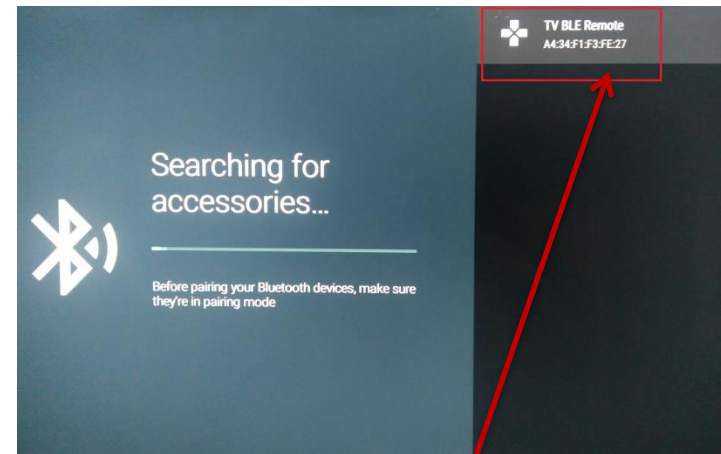

To Pair remote need to press HOME+LEFT ARROW key together

## Remote Pairing

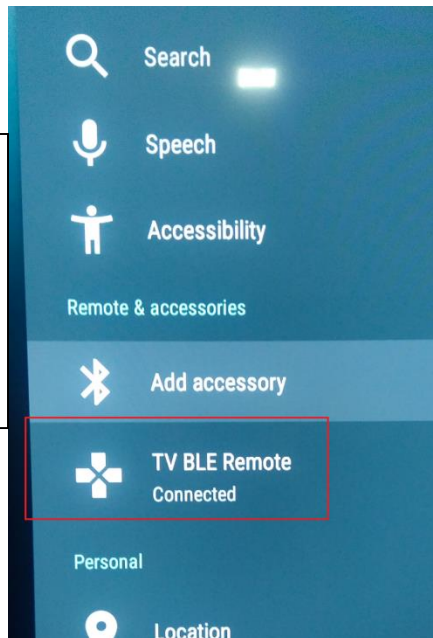

Now open  
TV settings  
and press  
"Add  
Accessory"

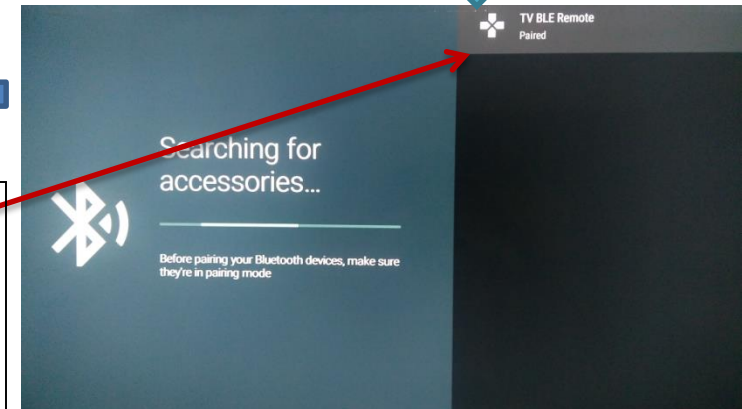

It will show Remote as TV BLE  
REMOTE, select this Remote by  
pressing OK key on remote. Make  
sure that remote LED is blinking  
as Green

After Pairing  
it will show  
in  
connected  
device.

Once paired it will  
show Paired here.  
Here you can see all  
your paired devices.

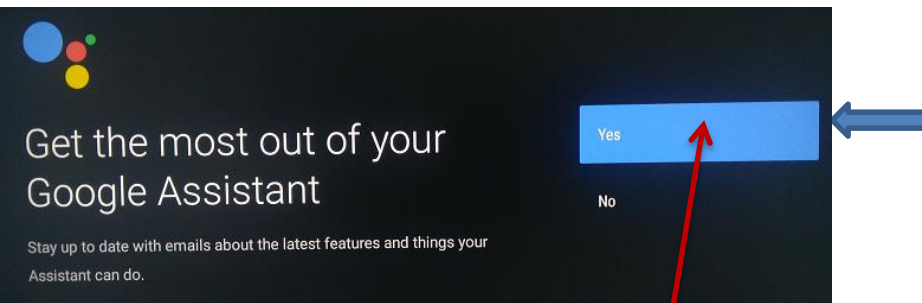

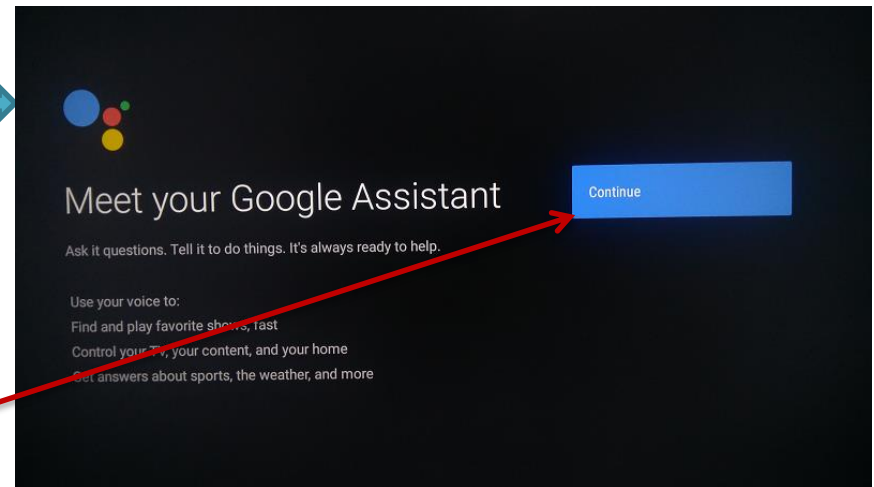

## Remote Pairing

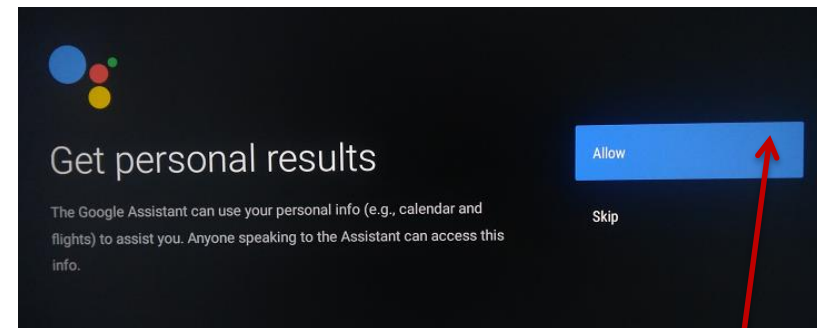

Now press MIC key on remote.

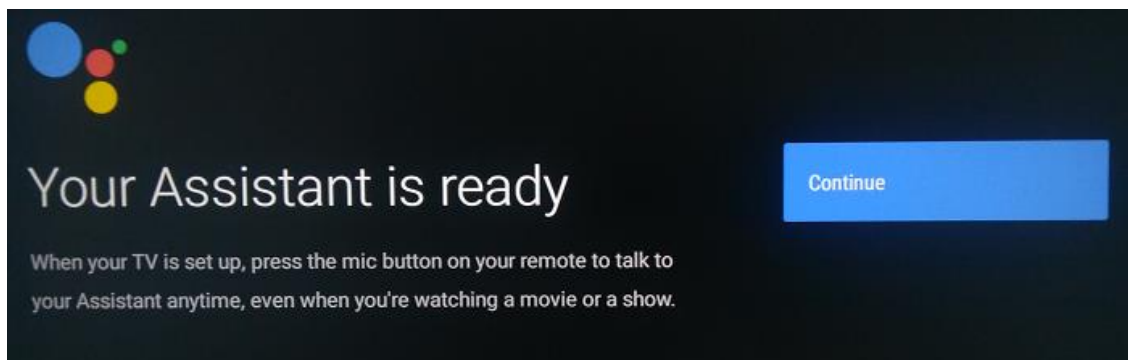

For First time it will ask you for set-up Google assistance, select Continue here

Select Yes for staying update with latest features

Select Allow for better search result

Set-up completed, press Continue
